FOR IMMEDIATE RELEASE

TRAFFIC CONTROL ON STATE ROUTE 12 BETWEEN SUISUN AND RIO VISTA

SOLANO – In an ongoing effort to improve safety along State Route 12 in Solano County, the California Department of Transportation (Caltrans) has scheduled three days of traffic control in January, 2009 to replace damaged channelizer posts on that route, weather permitting.

The traffic control between 9:00 a.m. and 3:00 p.m. will be from Monday, January 5, 2009 to Wednesday, January 7, 2009. This work could be delayed because of precipitation, as dry pavement is needed to perform the replacement operation.

A segment of the roadway between Denver Road, near Suisun City and Drouin Road in Rio Vista will be impacted by traffic delays of up to 20 minutes in each direction. The traffic control will enable Caltrans crews to replace channelizer posts in the centerline rumble strip which have been damaged or knocked down by traffic.

In an earlier effort in November, 2008 Caltrans replaced approximately 400 missing channelizers on the roadway.

Changeable message signs will be at key locations during the operation.

Channelizer posts delineate driving lanes with bright colors and help save lives by properly directing traffic and reducing the chance of accidents.

Motorists are advised to use caution when traveling through the area and please "Slow For The Cone Zone."

For more information please contact Ben Edokpayi at (510) 622 0120.
